## Illinois Epilepsy Centers

### Level 1

Level 1 epilepsy care typically occurs at an emergency room or a primary care physician's office with an epilepsy evaluation.

### Level 2

Level 2 epilepsy care involves a consultation with a general neurologist. This consultation may occur at a specialized epilepsy center.

### Level 3

A level 3 center provides the basic range of medical, neuropsychological, and psychosocial services needed to treat patients with refractory epilepsy. Level 3 epilepsy centers provide basic neuro-diagnostic evaluations, as well as basic medical, neuropsychological, and psychosocial services. Some level 3 centers offer noninvasive evaluation for epilepsy surgery, straight-forward resective epilepsy surgery, and implantation of the vagus nerve stimulator. These centers do not perform intracranial evaluations or other more complex epilepsy surgery.

- AMITA Health Comprehensive Epilepsy Center – Adult / Pediatric
- Northwestern Medicine Central DuPage Hospital Neurosciences Institute – Adult / Pediatric
- Loyola University Medical Center Comprehensive Epilepsy Program – Adult / Pediatric
- NorthShore University HealthSystem – Adult
- Northwest Community Healthcare

### Level 4

A level 4 center provides the more complex forms of intensive neuro-diagnostic monitoring, as well as more extensive medical, neuropsychological, and psychosocial treatment. Level 4 centers also offer a complete evaluation for epilepsy surgery, including intracranial electrodes and a broad range of surgical procedures for epilepsy.

- Northwestern Medicine Comprehensive Epilepsy Center – Adult
- Rush Epilepsy Center – Adult / Pediatric
- University of Chicago Adult Epilepsy Center
- University of Chicago Pediatric Epilepsy Center

*Fees and payment methods vary per institution, including insurance coverage accepted, and use of HMOs.  
Patients should be sure to ask about this before making an appointment.*
